## Roscom Inc

### Non-Phthalate Production

*\*References to "phthalates" in current regulations refer to ortho-phthalates only. To that end, all Roscom Non-phthalate products contain less than 1000 ppm of any ortho-phthalate. Questions regarding the literature to this disclaimer, or any questions pertaining to the use of these materials, please contact Roscom Sales and we will be happy to answer any questions you may have.*

Roscom is considered the number one custom compounder in North America and understands the growing concern and demand for supplying materials that are environmentally friendly. Roscom is pleased to announce we are now providing our customers with **NON-PHTHALATE\* COMPOUNDS**. Trends in environmental regulations suggest that plasticizers such as DOP, DINP, and DIDP will be banned by many states and the manufacturing of these hazardous products will be regulated.

For example, the Office of Environmental Health Hazard Assessment (OEHHA) administers the California Prop65 program which mandates the use of specific chemicals that are hazardous to the environment.

**Proposition 65** lists over 800 naturally occurring and synthetic chemicals that are hazardous not only to the environment but to our everyday lives which is why Roscom feels these changes to **NON-PHTHALATE\* COMPOUNDS** are essential.

**Registration Evaluation Authorization & the restriction of Chemical** substances were sanctioned in order to protect human health and the environment from the risks of harmful chemicals. **REACH** currently has 144 chemicals identified as SVHC (Substance of Very High Concern), including 10 Phthalates.

**Starting February 3, 2014** Roscom will began producing non-phthalate\* compounds on their designated non-phthalate\* production line. Roscom has isolated this production line from every aspect of the production process, starting with raw material delivery through to finished product packaging in order to prevent cross contamination. The goal is to provide current and future customers with our REACH/Prop65 compliant material.

Please contact Roscom Sales to learn more about our recent engineered changes, the advantages of being ecologically aware, and to receive a sample of our non-phthalate\* compounds for trial today.
