RE: Force Majeure Notice for PVC and VCM Supply

Effective immediately, Westlake Vinlys, Inc. ("Westlake") and Axiall, LLC ("Axiall") are declaring a system-wide force majeure condition for PVC and VCM manufactured and shipped from its North American operations.

The Westlake/Axiall North American Operations have been directly and indirectly adversely impacted by the severe cold weather conditions.

At this time, we are not able to predict the duration of this force majeure condition. This force majeure condition will cause supply disruptions and limit our ability to meet anticipated product demand. While this force majeure event declaration is required at this time, Westlake/Axiall is continuing to work on commercial options to lessen the impact on our customers.

We sincerely regret any inconvenience this causes your company and our need to inform you of this situation. We greatly appreciate your company’s understanding and support in working with us through this difficult time. We are committed to keeping you informed as our current situation develops and to restoring our contractual supply commitments as quickly as possible.

Your Westlake/Axiall sales professional will be contacting you with further details in the near future.

Sincerely,

[Signature]

Tom Clancy
Vice President, PVC/VCM
